PRÁCTICA-AUX-API

Estudiante : Condori Chambi Hayder C.I. : 12766912

Docente: Lic. Marcelo Aruquipa

Fecha: 17 de octubre de 2025

LA PAZ - BOLIVIA
2025

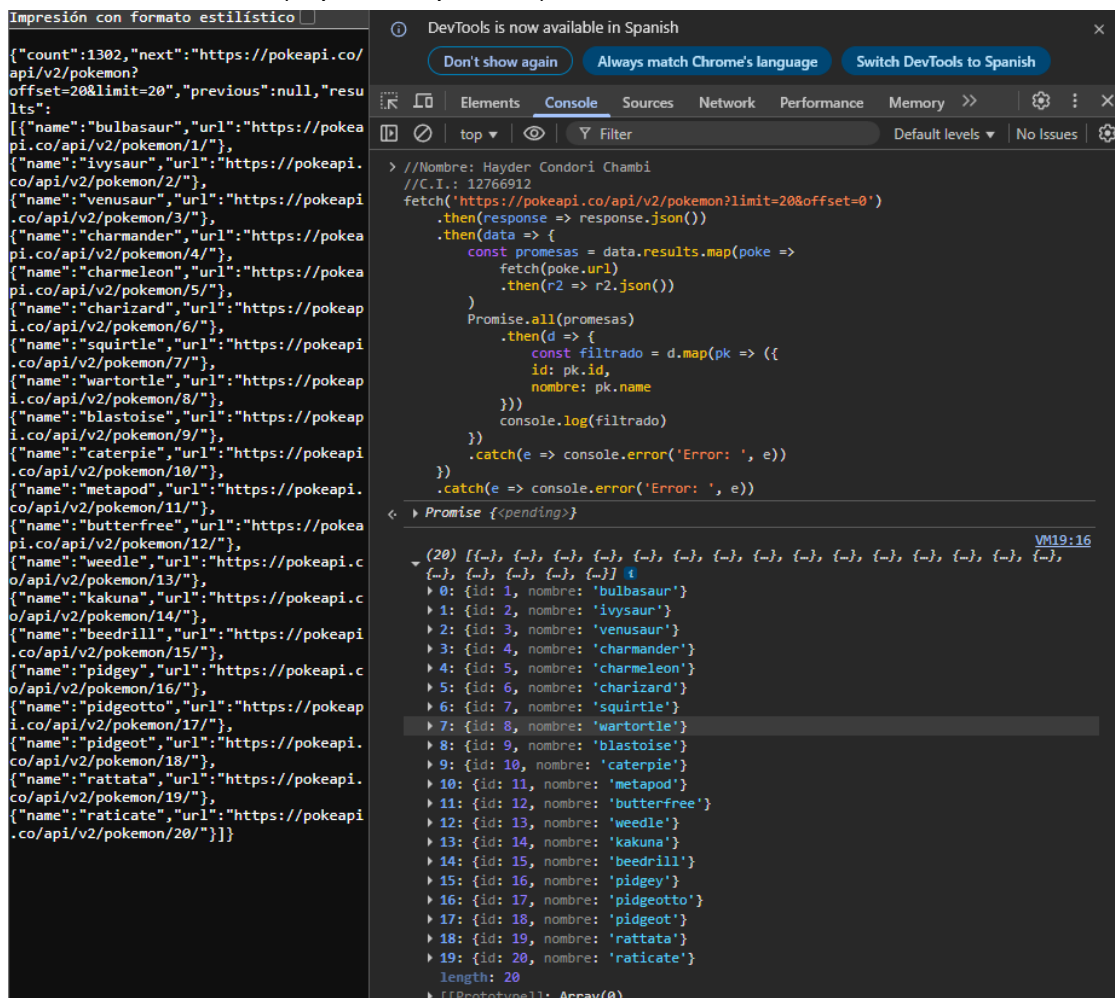

1. Listar los primeros 20 Pokémon (mostrar id y name)

Ruta API: <https://pokeapi.co/api/v2/pokemon?limit=20&offset=0>

El código utilizado (captura).

```
untitled -- Nombre: Hayder Condori Chambi
1 //Nombre: Hayder Condori Chambi
2 //C.I.: 12766912
3 fetch('https://pokeapi.co/api/v2/pokemon?limit=20&offset=0')
4   .then(response => response.json())
5   .then(data => {
6     const promesas = data.results.map(poke =>
7       fetch(poke.url)
8       .then(r2 => r2.json())
9     )
10    Promise.all(promesas)
11      .then(d => {
12        const filtrado = d.map(pk => ({
13          id: pk.id,
14          nombre: pk.name
15        }))
16        console.log(filtrado)
17      })
18      .catch(e => console.error('Error: ', e))
19    })
20    .catch(e => console.error('Error: ', e))
```

La salida en consola (captura de pantalla).

2. Buscar Digimon por nivel (entrada por CLI: rookie, champion, ultimate, etc.) y listar name + level

Ruta API: <https://digimon-api.vercel.app/api/digimon/level/{nivel}>

El código utilizado (captura).

```
64
65 //Nombre: Hayder Condori Chambi
66 //C.I.: 12766912
67 const nivel = prompt("Ingresa el nivel del Digimon (Rookie, Champion, Ultimate, etc):");
68
69 fetch(`https://digimon-api.vercel.app/api/digimon/level/${nivel}`)
70   .then(response => response.json())
71   .then(data => {
72     const filtrado = data.map(digimon => ({
73       name: digimon.name,
74       level: digimon.level
75     }));
76     console.log(`nivel ${nivel}:`, filtrado);
77   })
78   .catch(e => console.error('Error:', e));
79
80
```

La salida en consola (captura de pantalla).

The screenshot shows a web browser window with a list of Digimon names and their levels. The list is displayed in a table-like format with columns for the Digimon name and its level. The levels are all 'Champion'. The Digimon names listed are: Togemon, Numemon, Ikkakumon, Unimon, Ogremon, Devimon, Frigimon, and Nanimon. The browser's developer console is open, showing the JavaScript code used to fetch the data from the API and the resulting JSON response. The response is an array of 30 objects, each containing a Digimon name and its level. The first few objects are: {name: 'Kuwagamon', level: 'Champion'}, {name: 'Greymon', level: 'Champion'}, {name: 'Shellmon', level: 'Champion'}, {name: 'Garurumon', level: 'Champion'}, {name: 'Seadramon', level: 'Champion'}, {name: 'Monochromon', level: 'Champion'}, {name: 'Birdramon', level: 'Champion'}, {name: 'Meramon', level: 'Champion'}, {name: 'Kabuterimon', level: 'Champion'}, {name: 'Togemon', level: 'Champion'}, {name: 'Numemon', level: 'Champion'}, {name: 'Ikkakumon', level: 'Champion'}, {name: 'Unimon', level: 'Champion'}, {name: 'Leomon', level: 'Champion'}, {name: 'Ogremon', level: 'Champion'}, {name: 'Devimon', level: 'Champion'}, {name: 'Frigimon', level: 'Champion'}, {name: 'Mojyamon', level: 'Champion'}, {name: 'Sukamon', level: 'Champion'}, {name: 'Centarumon', level: 'Champion'}, {name: 'Bakemon', level: 'Champion'}, {name: 'Angemon', level: 'Champion'}, {name: 'Whamon', level: 'Champion'}, {name: 'Drimogemon', level: 'Champion'}, {name: 'Kokatorimon', level: 'Champion'}, {name: 'Tyrannomon', level: 'Champion'}, {name: 'Vegiemon', level: 'Champion'}, {name: 'Gekomon', level: 'Champion'}, {name: 'Flymon', level: 'Champion'}, {name: 'Gatamon', level: 'Champion'}, {name: 'Nanimon', level: 'Champion'}. The console also shows the prompt message and the filtered data for the 'Champion' level.

3. Obtener los primeros n nombres de Pokémon usando paginación en lotes de 50

====>comentario.- disculpe auxi no pude hacer este ejercicio, no entendí bien

Ruta API: https://pokeapi.co/api/v2/pokemon?limit=50&offset={k*50}

El código utilizado (captura).

```
79
80 //Nombre: Hayder Condori Chambi
81 //C.I.: 12766912
82 fetch('https://pokeapi.co/api/v2/pokemon?limit=50&offset=%7bk*50%7d')
83   .then(response => response.json())
84   .then(data => console.log('Datos: ', data))
85   .catch(e => console.error('Error: ', e))
```

La salida en consola (captura de pantalla).

```
> //Nombre: Hayder Condori Chambi
//C.I.: 12766912
fetch('https://pokeapi.co/api/v2/pokemon?limit=50&offset=%7bk*50%7d')
  .then(response => response.json())
  .then(data => console.log('Datos: ', data))
  .catch(e => console.error('Error: ', e))
< Promise {<pending>}
